- Albumin levels (main blood protein and nutritional status)
- Folate
- Vitamin D

Price: 56€.

A full interpretation of these results is not essential but is advised if there are markers that you are concerned about. Remember just being in range is not always good enough, we want to move more towards optimally health. Being at the bottom of 'in range' is not always ok.

I can help you make a targeted nutritional and supplement plan to improve your markers if this is the case. I will offer a discounted rate of £140 to all you lovely guest (normal rate is £240).

Kindly confirm your reservation for next Thursday, May 15th at your earliest convenience.
